4. Comments:

4.1) What did you like BEST about this class?

- I liked the group discussions, but preferred when we broke off into smaller groups.
- I liked the professor. She was nice and funny and easy to talk to.
- I really enjoyed all the discussions in the class and all the different viewpoints from other students. I was able to learn a lot and actually put the material we were learning about to use when I heard these stories.
- In class activities
- It's a relax and fun class.
- It's very easy and the variety of people are fun to talk to in class.
- N/A
- No exams or quizzes
- Professor Julie is great, the class discussions are amazing, my classmates and I were treated with respect, I have learned about different leadership styles, about my own leadership, etc.,

4.2) What did you like LEAST about this class?

- Almost everything I learned in this class I have learned in other classes. It was difficult to pay attention when I felt like I did not need to be in class. I felt bad, because the professor was so nice, but the class was very repetitive and boring. In all, the professor is good and the class itself is bad.
- Extremely boring and teacher reads off her notes for every slide. And no eye contact with the students. Also some of the activities we did were a little subjective and asked people to say things about how much money they had or their race and it was very awkward for students even if you weren't the students selected
- I couldn't see my grades on time.
- I dislike how since we do not have a lot of assignments it can be hard to get a good grade. I go to class every day, do the readings, and make assignments a priority, but still do not always do the best on assignments and I think it is because I do not know what to expect.
- N/A
- Professor Julie did not have any help this semester like other professors which is unfortunate and this certainly had an negative impact on the students, most are worried about their grade, she needs help with grading and such, it would also be helpful for her to give examples of what type of writing she is looking for.
- Some of the readings were boring and dry.
- Surprise assignments or posting them late at night and due the next day in class
- The professor solely used assignments from past professors without fully understanding their application to the course or requirements. She has said that she doesn't even read the readings prior to class because they are boring for example Grades were not posted on assignments on blackboard or in class so it was impossible to know how you were doing on assignments or the course in general and on several occasions she said she just doesn't have time for grading. I am not sure what this professor's qualifications are to teach this leadership course and would strongly recommend her having an assistant or further guidance from the director of the program because she does not dedicate time to our course and has mentioned in class several times that her focus is on completing her dissertation and from a student perspective that is highly offensive considering the amount of tuition I pay to have an involved and qualified professor.
